Usage

Before use, carefully read the directions on the packaging and act accordingly.

The aerosol should have room temperature.
Best processing temperature 5 to 30°C.
Before use, shake the aerosol.

Switch of the engine and allow to cool down. Remove the air filter.

Spray the exterior of the carburettor until the contamination has disappeared.

Spray the visible parts of the interior of the carburettor and allow to take effect.

Start the engine and let idle with very limited speed. Spray the carburettor cleaner several times at the air inlet and increase the speed of the engine. Switch the engine off and install the air filter.
